About Us

'A true Aussie Icon'

Trackabout Off Road Campers are not only an industry leader in design, innovation, quality and service but also one of the longest standing Australian manufactures in off-road camper trailers. What once started in the mid 1990's as a small business based in Brisbane's south has grown into a manufacturer that provides off road campers nationwide and beyond.

At Trackabout, every model and every option is the result of obsessive attention to detail and countless hours of "real world" RnD, dating back to our large rental fleet of campers in the early 2000s. Every element is thought of and no detail is too small for our attention. This means our product and its modular options work seamlessly across the range from our Touring Series to our Base Camp models.

A key point of focus for the design at Trackabout Campers is the evolution of our products. A lot of emphasis is put on our customer's off road needs which have allowed us to develop our product over many years. The basic principle of our product hasn't changed over the decades, solid, easy to use Australian made campers that will follow you up and down any journey you embark on. With a company founded and staffed by campers, evolution comes naturally.

With state of the art technology behind us, advancements through Computer aided design, laser cutting and refined assembly procedures have allowed us to maximise features, storage & usability therefore adding value for our customers. All of our components are finished to the highest standards, allowing aesthetics and practicality to bond effortlessly.

Trackabout has continued to prove itself as one of the best camper trailer manufactures here in Australia forging a reputation based on innovation, quality and comfort. So, make sure you have the best behind you!

construction

The body's leading edges are protected with rock guards

Each trailer is individually seam sealed by hand eliminating dust & water ingress

Australian made automotive pinch weld seals

Every seam folded & double stitched by qualified craftsmen

Australian made canvas

All stainless steel hardware on tents & entirely reinforced

step 1 choose your camper

step 2 / choose your tent

BASECAMP

Tent Set Up 3 min

Awning Set Up 8 min

Optional ensuite & tropical roof shown

A true, tried and tested model in our range. This tent is the result of decades of testing and has evolved through constant improvements in both options and finish. Our new range features a completely free standing tent with all poles permanently attached in the main structure, even standing on its own without guy ropes. Simply open the camper up, step inside and extend the internal pole system in the tent and you're done.

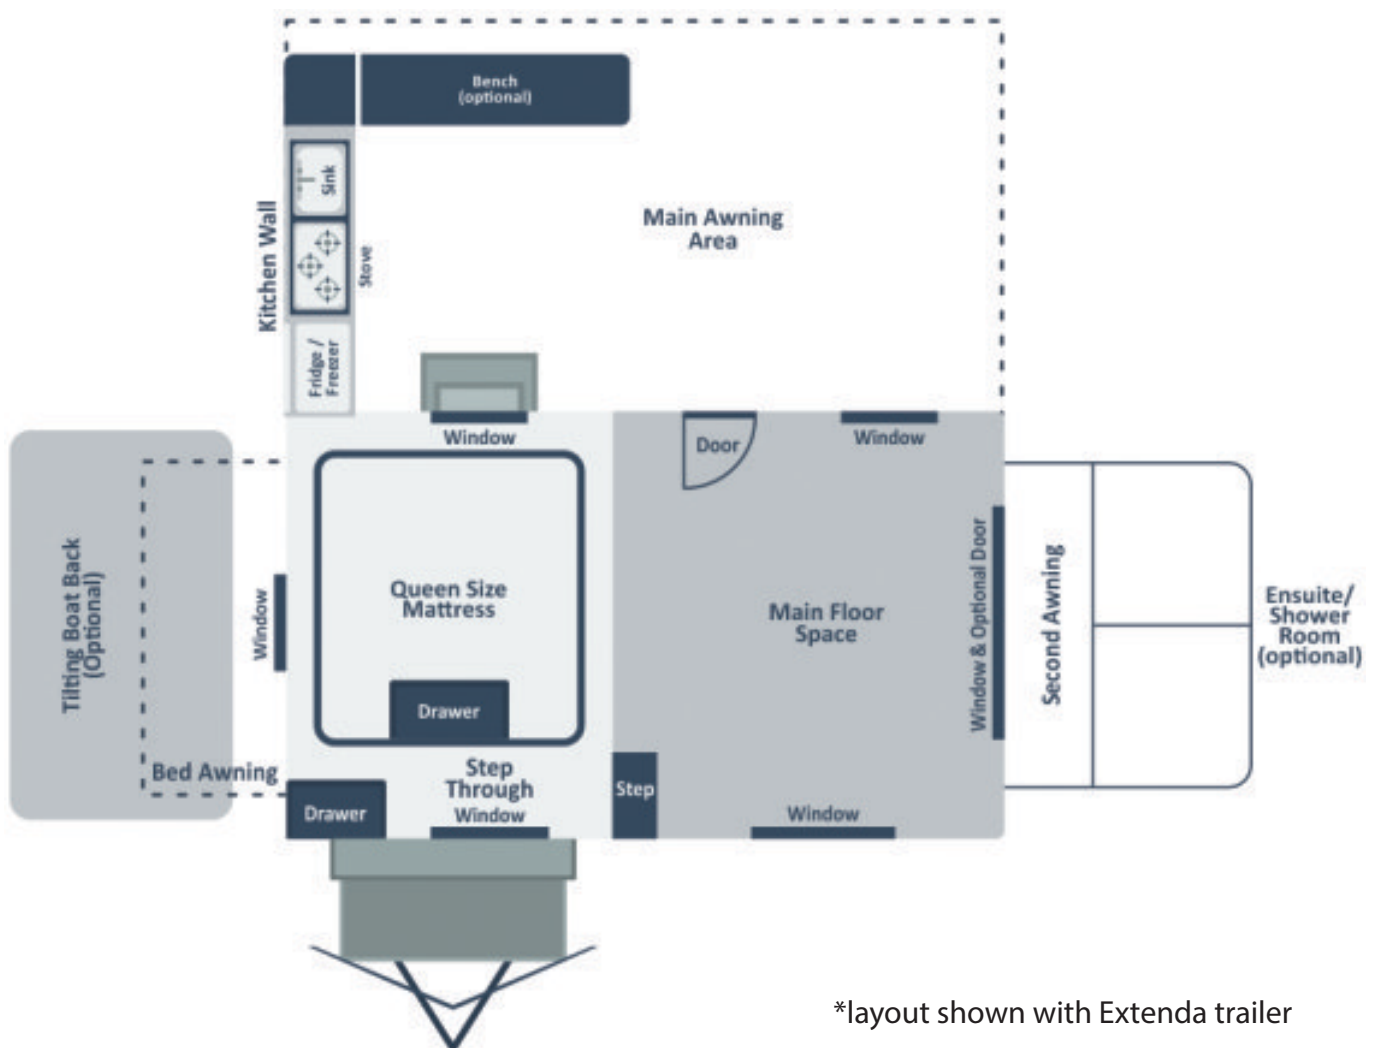

This tent is so versatile it can be set up in a matter of minutes for a comfortable one night getaway, a weekend with the family or extended stays at your favourite camp.

With an extensive list of standard features and options to adapt the tent perfectly to your needs, it will be sure to tick all the boxes.

'The true home away from home'

- Australian Wax Converters Dynaproofed canvas
- 10' x 7' (Explorer) 10' x 9' (Extenda) floor area
- 8' zip on awning with gable front & wall provisions
- Exclusive awning design eliminates water pooling without using additional poles
- Kitchen wall with large window
- 6 large full length window with canvas flap on inside
- 2 x lower wall vents to maximise airflow
- Zip access to mudguard box
- Unique zip gutter design provides excellent water ingress protection
- Bucket style zip in floor
- Easy internal pole system for tent setup in under 3 minutes
- Fully sealed tonneau with 6 adjustable pulldown straps to minimise flapping & dust/water ingress
- Quality poles, pegs & ropes needed for complete set up
- All stainless-steel fittings on tent
- Magazine pocket on wall

*layout shown with Extenda trailer

step 2 choose your tent

TOURING

Patent Application 2016100958

Full Set Up 3 min

The camper trailer has been re-imagined. We don't believe a quick set up camper trailer should be based on compromise. With a market that is flooded with "touring style" camper trailers, we boldly redesigned how the conventional camper is used. Why should you sleep on an undersized foam mattress & sacrifice the comforts, or have to leave the bikes, boats and outboards behind just to save time when you set up? With the Touring Series, you can have all this.

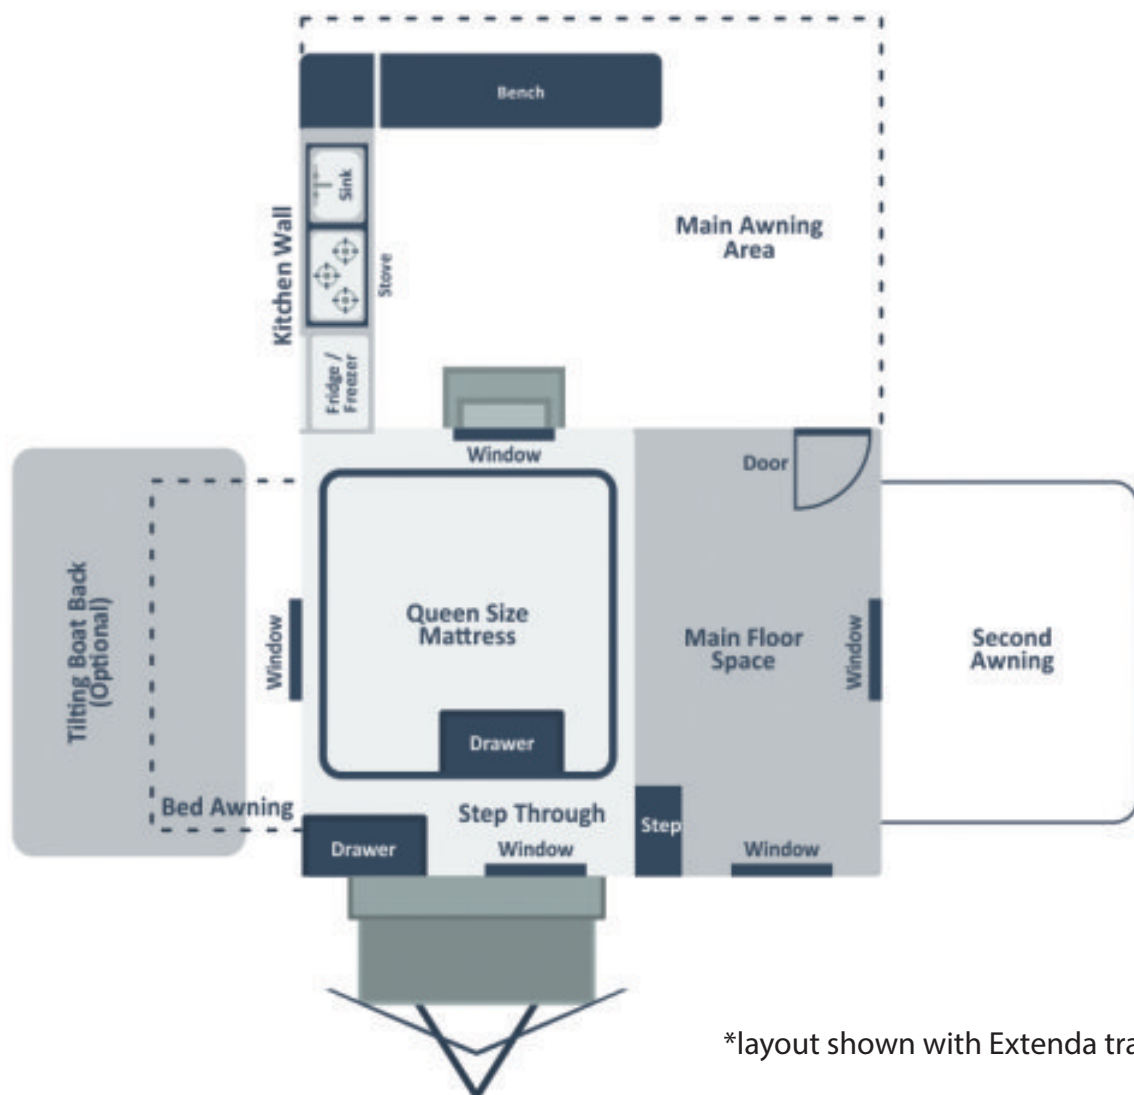

With strict criteria from both our sales representatives and customers seeking maximum comfort and storage with a minimum effort set up, our design team got to work. Our patented tent and awning design paired perfectly with our comfortable features and limitless storage on our Explorer & Extenda range.

The Touring Series tent can be set up for a quick stay after a long day on the tracks, for the whole family or anywhere in between due to its modular design in under 3 minutes. The quick setup is owing to the patented pole system for the tent and awning, this design eliminates the need to attach any further poles to support the canvas. It's as simple as extending the poles into the correct position and using the 2 quick clip guy ropes to anchor it down. Instead of following the trend of a detached kids room, we fitted the tent with separate walls and floor that attach to the main tent frame allowing you to set up as little or as much as you want adding privacy or protection from weather.

'Under 3 minutes, under a million stars'

- Australian Wax Converters Dynaproofed canvas
- 6.5' x 7' (Explorer) 6.5' x 9' (Extenda) floor area
- 8' attached awning with patented pole design – All awning poles fold away with tent
- Detachable kitchen wall
- Drop down privacy screen
- 5 large full length window with canvas flap on inside
- 2 x lower wall vents to maximise airflow
- Zip access to mudguard box
- Unique zip gutter design provides excellent water ingress protection
- Bucket style zip in floor
- Unique internal pole design
- Removable modular walls & floor
- Fully sealed tonneau with 8 adjustable pulldown straps to minimise flapping & dust/water ingress
- Quality poles, pegs & ropes needed for complete set up
- All stainless-steel fittings on tent

*layout shown with Extenda trailer

step 3 customise your camper

* Denotes optional upgrade

Fire up the bbq using the onboard gas with an extra quick connect outlet & 4 mtr gas hose.

making your favourite beverage, somewhere to put your bbq off
the ground and out of the awning for Sunday roasts or double
your bench space at camp in seconds. The return bench does it all.
Option*

Adjustable, corrosion
resistant legs.

Large slide out
pantry with over
430 ltr of storage.

Lightweight & durable
aluminium construction.

'A kitchen fit for a chef'

In modern homes the kitchen is one of the most used rooms in the house, why should your camper be any different. Basing our designs on maximising bench space and storage as well as a layout that works, we have created our new range of CAD engineered aluminium kitchens. The new range features an aluminium monocoque construction reducing internal weight by up to 25% whilst retaining strength and usability.

The impressive powder coated kitchen is fitted with the latest in Dometic stainless appliances, an Australian made 60litre fridge freezer and electric water pumps. Quick connect plumbed gas and water lines provide maximum convenience when camping. The dedicated drawers for cutlery, pots & pans, plates, bowls, glasses and mugs are all fitted with Italian soft close runners. The additional easy to access pantry with extra drawers provides unmatched storage and bench space.

The optional return bench increases the footprint of the kitchen in a matter of seconds, the whole unit supported by adjustable rust free aluminium legs.

Take your bikes camping & beyond

The ISI bike rack allows for easy storage of 2 or 4 bikes on your Trackabout without having to load & unload bikes every time you need to access the trailer.

The clever design also features an optional vehicle hitch that allows you to fit the rack to the car and explore the tracks nearby camp or a nice Sunday ride at home.

Boat rack? The anything rack!

Store boats, kayaks, firewood, mates' swags, roof rack bags, paddle boards, the list goes on.

When you don't feel like unloading when you get to camp, simply fold it out of the way with the assistance of the gas strut and set up the tent like it's not even there.

Speed up your adventures

The stainless steel outboard loader sits snugly in behind the stone guard protecting the motor from rocks and corrugations.

Like the rest of the trailer, the loader is designed to last, featuring laser cut, stainless steel componentry. Just undo the latch and the motor simply pivots into a ready to load position.

Playing in the mud is fun. Sometimes

Get yourself out of a sticky situation with these genuine Maxtrax.

These mounts are designed to carry up to four Maxtrax, featuring a lockable design, they are mounted on the front toolbox for ease of access whenever you need them.

make your trackabout your own

Onboard diesel powered ducted heating paired with hot water on demand to the kitchen & ensuite outlet. Creek suction included.

Increased clearance and a smoother ride with Cruisemaster independent coil suspension.

A bedhead fitted with Sirocco fans & LED touch lights enhances the already comfortable queen size mattress. Bed head Extenda only.

Hot water in a hurry. The Joolca gas unit is perfect for a hot shower at the end of a day. Creek suction standard

Individual power needs. We've got you covered from solar systems to the Redarc Manager 30 full power management system.

Far enough away from your tent so you don't flood it but close enough to be private. The Ensuite package makes bathroom trips easy

Consider yourself the gourmet camp chef? Then the Dometic 3 burner upgrade is for you providing more usable cooking space on the stove top and an extra burner.

Upgrade the wheels & tyres or match to your car for extra spares
*Not suitable for all vehicles

The tropical roof sits high above the tent roof creating an air gap to stop condensation in winter and keep the tent cool in summer. Like the tent, the tropical roof is also made from 100% Australian canvas.

Enjoy those hot showers for longer with a secondary water tank. This allows for 170ltr of water to be carried onboard. Extenda: Coil & leaf Explorer: Leaf only
